**POST TEST - DISCHARGE SUMMARY**

Question: True or False?	Answer
1. Discharge summaries need to include a recapitulation of the resident stay.	
2. Medication reconciliation includes counting all of the medications for that resident in the med cart when they are discharged.	
3. The discharge summary can only be released to post-discharge care providers if the resident consents.	
4. As long as you give the discharge summary to the home health agency, you don't need to keep one in the facility.	
5. Information about the resident from the MDS does not need to be included in the discharge summary.
